SUMMARY

Software Engineer with a specialization in Machine Learning, building models and data pipelines.
Built a delivery route planner that predicts delivery times with scikit-learn and PyTorch, serving plans through FastAPI and PostgreSQL. At a university data lab, built Python data pipelines and a FastAPI service that serves trained models. Works with Docker, Git, CI/CD, pandas, SQL and REST APIs.

TECHNICAL SKILLS

Machine Learning & Data scikit-learn, pandas, PyTorch, NumPy, Spark

Languages Python, SQL, TypeScript, Java

Backend & Web FastAPI, PostgreSQL, REST APIs, React

Tools Docker, Git, CI/CD, pytest, Linux, AWS

EXPERIENCE

2024 – 2025 Software Developer · Northfield University Data Lab

- Built Python data pipelines that clean and load research survey data into PostgreSQL for the lab's analysts.
- Developed a FastAPI service that serves the lab's trained models to an internal dashboard.

2019 – 2021 Robotics Technician · Brightline Logistics

- Maintained warehouse picking robots.

PROJECTS

Delivery Route Planner · B.Sc. Final Project

Python, scikit-learn, PyTorch, FastAPI, PostgreSQL, Docker, pytest

- Built a planner in Python that predicts delivery times per street segment and plans the shortest legal route for a day of deliveries.
- Compared gradient-boosted scikit-learn and PyTorch models on public delivery data, tested on a held-out month.
- Formulated route planning as a vehicle-routing problem with time windows.
- Served the models through a FastAPI backend with PostgreSQL, with a React and TypeScript front end.
- Packaged the project with Docker Compose and tested it with a pytest suite.

Product Review Classifier

Python, PyTorch, scikit-learn, pandas, LLM APIs

- Classified product reviews by topic and sentiment with a small transformer fine-tuned with PyTorch.
- Compared it with scikit-learn baselines, using pandas for the data.
- Labeled a first batch of training data with an LLM API, then checked the labels by hand.

Also built

- Shared Budget App: Web app for splitting shared bills (Java REST API, PostgreSQL, React)

EDUCATION

2021 – 2025 B.Sc. Computer Science · Data Science Track
Northfield University
Studied machine learning, deep learning, statistics, databases and algorithms.

Languages English (native), Spanish (professional).
